A peer-reviewed international journal, *Cognitive Semantics* takes the relationship between meaning and mind as its central concern. It welcomes submission of unpublished research from all theoretical orientations in linguistics. It is also intended to be a forum for scholars in related fields – such as psychology, anthropology, neuroscience, artificial intelligence, philosophy, and education – to disseminate their work studying the many and varied aspects of human cognition.

Articles for publication in *Cognitive Semantics* can be submitted online through Editorial Manager: www.editorialmanager.com/cosebrill.
