*Multisensory Research* is an interdisciplinary archival journal covering all aspects of multisensory processing including the control of action, cognition and attention. Research using any approach to increase our understanding of multisensory perceptual, behavioural, neural and computational mechanisms is encouraged. Empirical, neurophysiological, psychophysical, brain imaging, clinical, developmental, mathematical and computational analyses are welcome. Research will also be considered covering multisensory applications such as sensory substitution, crossmodal methods for delivering sensory information or multisensory approaches to robotics and engineering. Short communications and technical notes that draw attention to new developments will be included, as will reviews and commentaries on current issues. Special issues dealing with specific topics will be announced from time to time. *Multisensory Research* is a continuation of *Seeing and Perceiving*, and of *Spatial Vision*.

Thomson Scientific's Journal Citations Report for 2015 ranks *Multisensory Research* with an Impact Factor of 1.036.

Articles for publication in *Multisensory Research* can be submitted online through Editorial Manager: [www.editorialmanager.com/msrbrill](http://www.editorialmanager.com/msrbrill).
