REVIEWS EDITOR: **John Wearden** Keele University, UK

THEATRE & ARTS EDITOR: **Viviane Pouthas** CNRS-emeritus, Paris, France

ASSOCIATE EDITORS: **John Assad** Harvard University, Cambridge MA, USA & Italian Institute of Technology, Rovereto, TN, Italy; **Dean Buonomano** University of California, Los Angeles, CA, USA; **Jennifer Coull** CNRS, Aix-Marseille University, Marseille, France; **Ann Graybiel** MIT McGovern Institute for Brain Research, Cambridge, MA, USA; **Deborah Harrington** University of California, San Diego, CA, USA; **Richard Ivry** University of California, Berkeley, CA, USA; **Marjan Jahanshahi** UCL Institute of Neurology, London, UK; **Andreas Nieder** University of Tübingen, Germany; **Charles Spence** University of Oxford, UK

Timing is ever-present in our everyday life – from the ringing sounds of the alarm clock to our ability to walk, dance, remember, and communicate with others. This intimate relationship has led scientists from different disciplines to investigate time and to explore how individuals perceive, process, and effectively use timing in their daily activities.

Timing & Time Perception aims to become the forum for all psychophysical, neuroimaging, pharmacological, computational, and theoretical advances on the topic of timing and time perception in humans and other animals. We envision a multidisciplinary approach to the topics covered, including the synergy of: Neuroscience and Philosophy for understanding the concept of time, Cognitive Science and Artificial Intelligence for adapting basic research to artificial agents, Psychiatry, Neurology, Behavioral and Computational Sciences for neuro-rehabilitation and modeling of the disordered brain, to name just a few.

Given the ubiquity of interval timing, this journal will host all basic studies, including interdisciplinary and multidisciplinary works on timing and time perception and serve as a forum for discussion and extension of current knowledge on the topic.

Articles for publication in *Timing & Time Perception* can be submitted online through Editorial Manager: www.editorialmanager.com/timebrill.
